Education

National Base for Mathematical Research and Teaching Talents, Xinjiang University <i>B.S. in Mathematics and Applied Mathematics</i>	Urumqi, Xinjiang 2023.09 – 2027.06
Tsien Excellence in Engineering Program, Tsinghua University & X-Institute <i>Joint Program, Zero One Scholar</i>	Shenzhen, Guangdong 2024.06 – 2027.06
Institute of Neurological and Psychiatric Disorders, Shenzhen Bay Laboratory <i>Visiting Student, Wen Yuan's Research Group</i>	Shenzhen, Guangdong 2025.07 – 2025.09

Research Projects

National Undergraduate Innovation Training Program	2025.04 – 2026.04
<ul style="list-style-type: none">• Project: Copy Number Variation Conditional Diffusion Model: For Alzheimer's Disease Risk Assessment.• This project aims to integrate copy number variation (CNV) features from whole-genome sequencing data with multi-dimensional clinical data such as metabolic indicators. Leveraging the success of diffusion models in processing high-dimensional simulation data and protein phenotype prediction, we will construct a comprehensive framework consisting of CNV feature encoding, genomic region attention, and conditional U-Net diffusion modules. This will simulate CNV distribution changes and evolutionary processes in the genome, analyze the specific role of CNV in regulating Alzheimer's disease pathways, and ultimately improve disease risk assessment and early intervention accuracy. Supervised by Prof. Kai Wei.	
Chinese Academy of Sciences (CAS) Innovation Practice Training Program	2024.11 – 2025.09
<ul style="list-style-type: none">• Project: Extraction and Analysis of Global Heatwave Disaster Adaptation Elements Based on Multimodal BERT Model.• This research uses a multimodal BERT model to integrate text, images, and structured data to precisely identify key factors affecting heatwave adaptation. The research results will provide solid theoretical and data support for formulating scientific global heatwave response strategies and enhance society's overall disaster adaptation capabilities. Supervised by Researcher Yong Ge.	
Tsinghua University Tsien Excellence in Engineering Program ESRT	2024.08-2025.10
<ul style="list-style-type: none">• Project: From Signal to Symphony: Predicting Protein Function with a Deep Learning Fusion Model on Sonified Sequences.• This research introduces a novel computational framework that translates protein sequence and structural information into musical encodings to predict function and guide protein design. The study systematically demonstrates the value of co-evolving both data representation and model complexity through a three-stage comparative analysis, achieving 90.44% accuracy. The framework was also integrated into a conditional diffusion model to guide the generative design of novel, structurally viable Green Fluorescent Protein (GFP) variants. Supervised by Prof. Kai Wei.	
Provincial Undergraduate Innovation Training Program	2024.03 – 2025.06
<ul style="list-style-type: none">• Project: Research on the Generation Cyclability of Cartesian Product Graphs and Related Problems.• This project mainly focuses on studying the generation cyclability of the n-th Cartesian product graphs of complete graphs. Currently, there are research results on the generation cyclability of n-th Cartesian product graphs of complete graphs with two vertices and three vertices. I mainly study the generation cyclability of n-th Cartesian product graphs of complete graphs with at least 4 vertices. Supervised by Prof. Eminjan Sabir.	

Professional Experience

Beijing Frontier Research Center for Biological Structure, Tsinghua University

Beijing, China

Research Intern

2026.07 – Present

- Developed the [Polypeptide Structure Database](#) and engaged in protein and polypeptide design research.

Institute of Software, CAS & Huawei Mindspore Community

Remote

Open Source Intern

2024.09 – 2025.03

- Implemented a VGG19-based model for Pollock-style art generation, focusing on fractal and turbulent feature extraction and the creation of NFT-based digital labels. Featured on [Huawei's official Wechat](#).

Awards & Honors

- **The Mathematical Contest in Modeling (MCM)**: Honorable Mention 2025
- **Alibaba Cloud Tianchi University Student Competition**: National Finals, 17th Place 2024
- **APMCM Asia-Pacific Mathematical Modeling Competition**: National Third Prize 2024
- **“Alpha Egg Cup” National Go Championship**: 15th Place 2024
- **Xinjiang Youth Amateur Go Competition**: 53rd Place 2024
- **Hunan Province Spring Cup Go Competition**: 7th Place 2024
- **National Youth Intellectual Sports Meeting Go Competition**: 9th Place 2024
- **Xinjiang University Vulnerability Reporting Honor** 2023
- **“Tianshan Fixed Network Cup” Cybersecurity Skills Competition**: 7th Place, Xinjiang Region 2023

Academic Activities
