Education

National Base for Mathematical Research and Teaching Talents, Xinjiang University <i>B.S. in Mathematics and Applied Mathematics</i> — Mentored by Yan-Hong Qin & Kai Wei	Urumqi, Xinjiang 2023.09 – 2027.06
Tsien Excellence in Engineering Program, Tsinghua University & Shenzhen X-Institute <i>Joint Program, X Scholar</i> — Representation learning for protein function and dynamics	Shenzhen, Guangdong 2024.06 – 2027.06
Institute of Neurological and Psychiatric Disorders, Shenzhen Bay Laboratory <i>Visiting Student, Wen Yuan's Research Group</i> — Single-cell bioinformatics for neurobiology studies	Shenzhen, Guangdong 2025.07 – 2025.09
Institute of Systems and Physical Biology, Shenzhen Bay Laboratory <i>Visiting Student, Kai Huang's Research Group</i> — IDP, LLPS & genome folding, undruggable-target design	Shenzhen, Guangdong Starting 2026.07

Selected Publications

Name in bold; † co-first author; * corresponding author.

Direction 1: Representation Learning & Biomolecular Mechanisms

- [1] **Wang, Y.**, et al. (2026). Sequence context decodes multi-state conformational heterogeneity from crystallographic B-factors. *Science China Life Sciences*, in press (earlier version: LMRL Workshop at ICLR 2026).
- [2] **Wang, Y.**, et al. (2025). From Signal to Symphony: Exploring 2D Sequence Representations for Protein Function Prediction. *Journal of Chemical Information and Modeling*.
- [3] **Wang, Y.†**, et al. (2025). Diffusion Models at the Drug Discovery Frontier: A Review on Generating Small Molecules versus Therapeutic Peptides. *Biology*.
- [4] **Wang, Y.†**, et al. (2026). Integrating deep learning and pangenomics to recover missing heritability from wild structural variations. *BMC Genomics*.
- [5] **Wang, Y.***, et al. (2026). Integrative transcriptomics, machine learning, and molecular docking derive a DAM-like macrophage signature for risk stratification and therapeutic nomination in glioblastoma. *Computational Biology and Chemistry*.
- [6] Wang, X.†*, **Wang, Y.†***, et al. (2025). Octopus Inspired Optimization (OIO): A Hierarchical Framework for Navigating Protein Fitness Landscapes. In *2025 IEEE International Conference on Bioinformatics and Biomedicine (BIBM)*. IEEE.
- [7] **Wang, Y.***, et al. (2026). Comment on: “GLM7 – A Novel Composite Glycolipid Index Derived from Routine Health Indicators for Enhanced Diagnosis and Prediction of Multimorbidity”. *Advanced Science*. (correspondence).
- [8] **Wang, Y.***, et al. (2025). AI for disease prediction: Performance insights and key limitations. *Journal of Clinical Neuroscience*. (correspondence).

Direction 2: First-Principles of Biological Complexity Based on Mathematical Physics

- [9] **Wang, Y.*** (2026). Spectral analysis of protein backbone geometry reveals abrupt helix–coil boundaries. *The European Physical Journal E*.
- [10] **Wang, Y.*** (2026). Descriptive power and predictive limits of a discrete Hasimoto–DNLS model of protein backbone structure. *Physica D: Nonlinear Phenomena*.

Direction 3: Interdisciplinary Explorations & Collaborative Synergies

- [11] **Wang, Y.**, et al. (2026). Hamiltonian Connectivity in k -Ary n -Cubes under a Region-Based Fault Model. *Information Sciences*.
- [12] **Wang, Y.***, et al. (2026). AI Driven Discovery of Bio Ecological Mediation in Cascading Heatwave Risks. *Physics and Chemistry of the Earth*.
- [13] **Wang, Y.***, et al. (2026). Geometric Fragility in Alzheimer's Disease: Probing the Loss of Hippocampal Hierarchical Abstraction via Contrastive Point Cloud Modeling. In *2026 IEEE International Conference on Systems, Man, and Cybernetics (SMC)*. IEEE.

Research Projects

- Tsinghua University Tsien Excellence in Engineering Program ESRT** 2024.08-2025.10
- **Project:** From Signal to Symphony: Exploring 2D Sequence Representations for Protein Function Prediction.
 - Motivated by an intuition that protein structure mirrors music—catalytic sites resembling melodic climaxes and β -sheets resembling calmer passages—I encoded amino acid sequences as 2D spectrograms (protein sonification) for function prediction. Ablations across an 18,000-sequence/12-class benchmark showed the 1D→2D representational structure itself, rather than explicit biophysical priors, was the key driver of performance, matching ESM-2 and ProtBERT and reaching 90.44% on the external CARE benchmark.
 - [Project Repository](#). Supervised by Prof. [Kai Wei](#).
- Chinese Academy of Sciences (CAS) Innovation Practice Training Program** 2024.11 – 2025.09
- **Project:** A Knowledge Graph-based Q&A System for Heatwave Disaster Adaptation.
 - Built HeDA, an autonomous synthesis agent that constructs a knowledge graph (34,933 entities, 42,890 relations) from 8,365 publications to map compound-heatwave cascading risks. On a temporally held-out multi-hop benchmark, graph augmentation improved accuracy by 8.1–9.8% over standalone foundation models; topological analysis surfaced a bio-ecological mediation effect, where biological systems act as the primary structural mediators transforming physical hazards into systemic socioeconomic losses.

- [Project Repository](#). Supervised by Researcher [Yong Ge](#).

Provincial Undergraduate Innovation Training Program

2024.03 – 2025.06

- **Project:** Research on the Generation Cyclability of Cartesian Product Graphs and Related Problems.
- Studied Hamiltonicity of the k -ary n -cube Q_n^k , a classical graph-theoretic interconnection topology. Motivated by the fact that real-world faults are spatially clustered rather than independent, I introduced the Region-Based Fault (RBF) model characterizing faults as connected subgraphs, and gave a constructive proof that Q_n^k remains Hamiltonian-connected for odd $k \geq 3$, $n \geq 2$ under RBF conditions, via an adaptive graph-decomposition argument robust well beyond its theoretical guarantees.
- [Project Repository](#). Supervised by Prof. [Eminjan Sabir](#).

National Undergraduate Innovation Program

2025.05 – 2026.12

- **Project:** Conditional Diffusion Model on Copy Number Variation for Alzheimer's Disease Risk Assessment.

Tsinghua University Tsien Excellence in Engineering Program ORIC

2025.12 – 2026.12

- **Project:** Application of Artificial Intelligence in Whole Genome Selection Breeding.

Chinese Academy of Sciences (CAS) Innovation Practice Training Program

2025.11 – 2026.11

- **Project:** Urban Big Data, Multimodal Fusion and Spatial Intelligence Analysis (Second Author).

Professional Experience

Beijing Frontier Research Center for Biological Structure, Tsinghua University

Beijing, China

Intern 2025.07 – Present

- Developed the [Peptide Design Competition Website](#), the [Polypeptide Structure Database](#) and engaged in protein and polypeptide design research. Supervised by Prof. Yafei Yuan and Prof. [Tong Wang](#).

Institute of Software, CAS & Huawei Mindspore Community

Remote

Intern 2024.09 – 2025.03

- Implemented a VGG19-based model for Pollock-style art generation, focusing on fractal and turbulent feature extraction and the creation of NFT-based digital labels. Featured on Huawei's official Wechat.

Awards & Honors

- **China Undergraduate Life Science Contest:** National Second Prize 2026
- **"Challenge Cup" China College Students' Extracurricular Academic Science and Technology Works Competition:** Autonomous Region Second Prize 2026
- **China College Students' E-Commerce "Innovation, Creativity and Entrepreneurship" Challenge:** Autonomous Region Second Prize 2026
- **China College Student Self-improvement Star** 2025
- **UN Global Leadership and ESG Programme × X-Institute Shenzhen "AI for the Young and the Elderly" Challenge:** Best Innovation Award 2026
- **Smart Chemical City Challenge (Xinjiang Station):** Second Prize 2025
- **Contemporary Undergraduate Mathematical Contest in Modeling (CUMCM):** National Second Prize 2025
- **SynBio Challenges:** Silver Award × 2 2025
- **2025 X-Fusion "Global Innovator Fusion Conference":** Best Poster Award 2025
- **The Mathematical Contest in Modeling (MCM):** Honorable Mention 2025
- **Alibaba Cloud Tianchi University Student Competition:** National Finals, 17th Place 2024
- **APMCM Asia-Pacific Mathematical Modeling Competition:** National Third Prize 2024

Academic Activities

Peer Reviewer: ICLR/ICML/NeurIPS workshops; Urban Climate; Physics and Chemistry of the Earth; Mini-Reviews in Medicinal Chemistry; Current Science; F1000Research; Frontiers in Chemistry; Frontiers in Physics; Frontiers in Aging Neuroscience; European Journal of Physics.

Academic Engagement:

- Tsinghua University-Peking University Center for Life Sciences Summer Camp 2025.07
- Shenzhen Bay Laboratory / Shenzhen Medical Academy of Research and Translation Summer Research 2025.07 – 2025.09
- Tsinghua University Tsien Excellence in Engineering Program – Zero One Scholar 2024.06 – 2027.06
- AI Winter School, Brown University Department of Physics 2025.01
- CAAI Artificial Intelligence and Technology Ethics Training Course 2024.09 – 2024.12
- Fudan University Summer School of Mathematical Logic 2024.08
- Wuhan University National Tianyuan Mathematics Center Discussion Class 2024.03 – 2024.06
